PROFESSIONAL SUMMARY

Senior Creative Technologist and Full-Stack Product Developer combining web and Android development, UI/UX and product design with 12+ years of experience in video production and digital content creation. Works across requirements, frontend and backend development, testing and delivery, bringing technical problem-solving and visual storytelling to digital products. Experience includes Unity game development and foundational knowledge of Unreal Engine.

CORE SKILLS

Programming: Python, C#, C++, JavaScript, TypeScript, PHP, Dart.

Web & Backend: React, Next.js, Laravel, REST APIs, authentication and authorization, WordPress.

Android Development: Android applications, Flutter, API integration, local storage and file handling.

Data & Tools: PostgreSQL, relational data modeling, Git, GitHub, Docker.

Design: UI/UX, product design, responsive interfaces, interaction design, Adobe Illustrator.

Digital Media: Video editing, color grading, VFX/SFX, motion graphics integration, audio post-production.

Game Development: Unity, C# gameplay prototyping; Unreal Engine (foundational knowledge).

AI-Assisted Workflows: Implementation, debugging, testing and documentation.

PROFESSIONAL EXPERIENCE

Full-Stack Product Developer

Freelance & Independent

- Develop web applications, Android apps and software tools, working across product planning, frontend and backend development, databases and APIs.
- Translate requirements into responsive interfaces and application workflows; handle implementation, testing, troubleshooting and delivery.
- Use AI-assisted development workflows to support implementation, debugging, testing and documentation, guided by project requirements and user experience.

Freelance Video Editor

Independent Feb 2015 - Present

- Completed 100+ video projects for clients across different industries, managing editing, revisions and final delivery.
- Edit footage using Adobe Premiere Pro and After Effects, applying color correction, grading, motion graphics and visual effects.
- Integrate sound effects and complete audio post-production in Adobe Audition to support cohesive visual storytelling.
- Organize production assets and manage concurrent projects, revisions and delivery deadlines.

SELECTED PROJECTS

TAMMIVO

Digital tools platform and Android companion app development

React | Next.js | TypeScript | FFmpeg WebAssembly

- Developed a browser-based tools platform with responsive interfaces and browser-side media processing.
- Integrated audio conversion and audio extraction through a shared FFmpeg WebAssembly engine; worked on the Android companion app.

tammivo.com

Crisis Fund Platform

Financial management and emergency-assistance platform

Laravel | Next.js | Flutter | PostgreSQL | Docker

- Built a multi-application solution with a web client, mobile app and backend API for financial and emergency-assistance workflows.
- Implemented payment reconciliation, approval workflows, ledger posting, role-based access and duplicate-transaction protection.

Game Development Projects

Unity prototypes and foundational Unreal Engine work

- Created five playable 2D/3D game prototypes with Unity and C#, including gameplay mechanics, user interfaces and interaction systems.
- Building foundational Unreal Engine knowledge through Barari, an in-development C++ game project.
